FEATURED PROJECTS

- Service Booking Platform (Capstone)

React • Node.js • Express.js • MongoDB • Socket.IO

 - Web and mobile application with features including live chat, dynamic filtering, and integrated dashboard
 - Implemented secure user authentication, service provider ratings system, and booking management with automated notifications
- Real-Time Chat Application

React • Node.js • MongoDB • Socket.IO • Zustand

 - Built real-time messaging platform with instant notifications, friend request system, and dynamic friendship management
 - Implemented WebSocket connections for live communication and optimized state management using Zustand
- Point of Sale System

React • Laravel • SQL • Chartjs • Zustand

 - Created comprehensive POS system with inventory management, sales tracking, and automated reporting features, and expense management
 - Developed analytics dashboard with visual charts for daily, monthly, and annual sales performance
- Music exploration platform

React.js • Tailwind CSS • MySQL • Python

 - A modern music platform for browsing, saving, and playing songs using YouTube Music data
 - Includes library, playlists (public & private), and seamless SSO integration
 - Modern design with user friendly UI and real-time lyrics implementation

EDUCATION

Bachelor of Science in Information Technology
FAITH COLLEGES BATANGAS (2020 - 2024)
